

The Robots are Coming: Navigating Privacy Challenges in AI-Powered Robotics in Public Settings and Homes – Part 1 [Transformative AI: Legal Leaps]

Christopher Dodson and Andrew Baer examine the privacy implications of AI-powered robotics in public and private spaces on Transformative AI: Legal Leaps. As AI-driven robots become more prevalent in everyday life, they highlight key concerns, including data collection practices, regulatory gaps, and the broader legal landscape shaping this rapidly evolving field.

Christopher and Andrew explore the expanding role of AI-powered robots in homes, workplaces, and public areas, where they are being used for surveillance, deliveries, personal assistance, and even health care applications. They also highlight the need for stronger regulatory frameworks.
