

# The Intersection of Information Governance and eDiscovery

## Location

Webinar

## Date & Time

Start Date: 01/24/2023

Start Time: 4:00 pm

End Time: 5:00 pm EST

Information governance and data management plans and policies provide the processes and procedures by which businesses manage information to drive value, while minimizing risk. Since eDiscovery requires the identification, preservation, collection and production of information, corporations must consider these topics simultaneously. This presentation will define these subject matters and provide practical guidance and best practices to ensure that companies can meet their legal, regulatory, and compliance obligations in an efficient and cost effective manner.
