

Webinar: CyberSubroSM II

Location

Webinar

Date & Time

Start Date: 09/29/2016

Start Time:

11:30 a.m. – 12:30 p.m. ET

10:30 a.m. – 11:30 a.m. CT

9:30 a.m. – 10:30 a.m. MT

8:30 a.m. – 9:30 a.m. PT

David Walton and Matthew Noone of the [Privacy, Data, & Cybersecurity Industry Team](#), present this Cozen O'Connor webinar discussing cybersecurity and the rise of cyber related litigation. This webinar will cover recovery opportunities for cyber claims and the potential sources for these claims, the emerging theories and evaluation of recovery related to cyber-related losses and the differences and similarities between traditional subrogation recovery and CyberSubroSM. Real life cyber-breach and recovery scenarios will be presented and The Internet of Things and its impact on recovery opportunities for cyber-related claims will also be covered.

Cybersecurity is dominating the insurance and legal worlds right now. Chinese hackers, Anonymous, and cyber criminals are all creating havoc on businesses trying to protect sensitive data from criminals. The legal costs for these cases are astronomical. As a result, premiums for cyber insurance are booming and cyber-related litigation is on the rise. While many firms are developing privacy and data security practices, not much attention is being given to recovery opportunities for cyber claims. In a world where cyber claims can cost several millions dollars to litigate and resolve, we need to focus on how insurance companies potentially recover these losses through subrogation.

FL, GA, NC, TX approved for 1 CE credit. 1 CLE credit pending.
