

Jennifer Brandt Appears on the Dr. Drew Midday Live Show

Friday, December 27, 2019

Jennifer Brandt, chair of the firm's Family Law group, was a guest on the Dr. Drew Midday Live Show discussing a *MarketWatch* article about the upside to no-fault divorces. The article says, "in states with 'no fault' divorces, couples are 8 percent more likely to both work full-time outside the home and it's 5 percent more likely that the wife is in the labor force." After the holidays, January is usually the time when people decide they want a fresh start in their life.
